MEET OUR SPECIALISTS

Christopher V. Lisi, MD
Chief, Division of ENT (Otolaryngology)
Head & Neck Surgery
Board Certified – Otolaryngology

Christopher V. Lisi, MD, is a board certified ear, nose, and throat surgeon with a special interest in adult and pediatric sinus, nasal, and voice disorders. He is trained in the latest state-of-the-art procedures for ear, nose, and throat conditions, including minimally invasive sinus procedures.

Daniele J. Kouroupos, PA-C
Senior Physician Assistant
NCCPA Board Certified

Daniele J. Kouroupos is an NCCPA board certified physician assistant with many years of experience in the field of otolaryngology. She has practiced in both a private office and hospital setting after joining the Richmond University Medical Center team in 2013. While she provides comprehensive ENT care to adults and children, she specializes in pediatric otolaryngology.

Treatment for the whole family

We provide comprehensive medical care and surgical treatment for both children and adults, while working closely with providers from several different specialties, including audiology, speech therapy, balance therapy, allergy, and adult and pediatric anesthesiology.

Minimally invasive in-office procedures (for select patients)

Our staff has extensive experience in the following procedures to relieve symptoms such as chronic sinus infection, facial pressure, and ear issues:

- ▶ Balloon sinuplasty
- ▶ Nasal polyp removal
- ▶ Sinuva sinus implant for nasal polyps
- ▶ Eustachian tube dilation
- ▶ Latera nasal implant
- ▶ Clarifix procedure for chronic runny nose
- ▶ Turbinate reduction
- ▶ Vocal cord injection
- ▶ Needle biopsy of neck masses
- ▶ Ear tube insertion

PERSONALIZED, EFFECTIVE CARE

From sinus issues to thyroid surgery, our expertly trained specialists use state-of-the-art technology to ensure our patients receive high quality care while relieving discomfort from:

- ▶ Nasal and sinus conditions
- ▶ Voice and swallowing disorders
- ▶ Enlarged tonsils and adenoids
- ▶ Allergies
- ▶ Hearing and balance problems
- ▶ Snoring and sleep apnea
- ▶ Pediatric ENT conditions

COMPREHENSIVE CANCER SERVICES

We also offer surgery and treatment for benign and cancerous conditions of the head and neck, thyroid, and salivary glands, including skin cancer removal.

- ▶ Our team works closely with the oncology experts at Richmond University Medical Center's Center for Cancer Care to diagnose and treat cancerous conditions of the head and neck.
