*Helping You
Maintain a Life
in Motion*

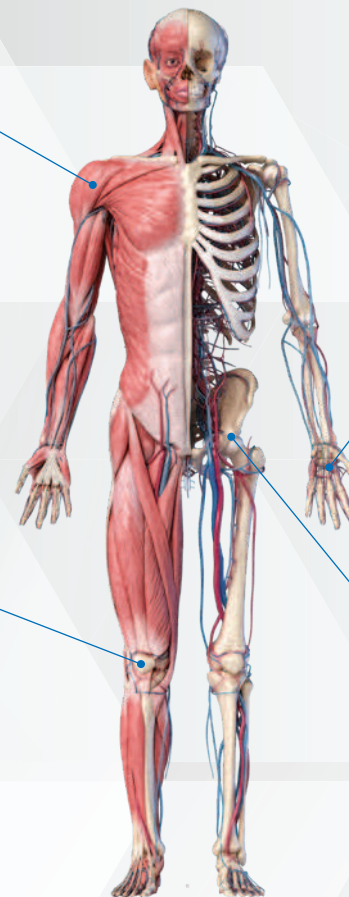

Shoulder Surgery

- Minimally invasive all-arthroscopic labrum repair and rotator cuff repairs
- Reverse shoulder replacement
- Revision rotator cuff repair surgery
- Shoulder reconstruction
- Shoulder resurfacing / "partial joint replacement"
- Shoulder stabilization for dislocations
- Total shoulder replacement

Knee

- Arthroscopic ACL reconstruction
- Cartilage restoration "microfracture" surgery
- Arthroscopic meniscus repair
- Partial knee replacement
- Revision total knee replacement
- Total knee replacement

Fractures and Trauma

- Casting and brace treatment
- Surgical stabilization
- Treatment for all fractures

Hand Surgery

- Carpal tunnel syndrome
- Complex hand and wrist fractures
- Trigger finger release and injection procedures
- Wrist and hand arthritis treatment:
 - Wrist and hand fusion surgery
 - Thumb interposition surgery prosthesis
 - Steroid injections for symptom relief

Hip

- Revision total hip replacement
- Total hip replacement (including anterior approach)

AT THE FOREFRONT OF MINIMALLY INVASIVE SURGERIES

- ▶ We are expertly trained in arthroscopic surgery, which revolutionizes the way joint damage can be treated and repaired. Patients benefit from faster recovery times, shorter hospital stays, and less scarring.
- ▶ We are the first in the country to use state-of-the-art techniques during joint replacement surgery, including the use of absorbable antibiotic beads to help minimize infection risk.
- ▶ Total knee replacement surgeries are performed using new-age low-profile more anatomic or life-like prostheses. We performed the first navigation-assisted total knee replacement surgery on Staten Island.

SPORTS MEDICINE: GETTING YOU BACK IN THE GAME

Are you an athlete or a physically active individual who has had a recent injury such as an ACL tear or shoulder impairment? We specialize in sports-related injuries and conditions, delivering individualized care to help you improve performance and return you to an active lifestyle.
